
MATTER FOR WADA EXECUTIVE COMMITTEE

DECISION

DEPARTMENT/AREA: SCIENCE AND MEDICINE, LABORATORY DIVISION

SUBJECT: TECHNICAL DOCUMENT – TD2023LDOC
LABORATORY DOCUMENTATION PACKAGE

1. **DECISION REQUESTED**

WADA Executive Committee to approve the TD2023LDOC (Technical Document for Laboratory Documentation Package), to come into effect on 1 September 2023. [The TD2023LDOC replaces the former TD2022LDOC].

2. **BACKGROUND**

WADA Technical Documents (TD), which are related to the International Standard for Laboratories (ISL), are mandatory documents of the World Anti-Doping Program.

WADA's TDs provide specific requirements to WADA-Accredited Laboratories and Anti-Doping Organizations. As part of WADA's mandate to enhance anti-doping activities under the World Anti-Doping Code, TDs undergo periodic revisions to reflect scientific and technological advances in the performance of anti-doping tests and the reporting of test results. TDs are refined and revised in consultation with WADA stakeholders.

This recent review of the WADA TD2023LDOC was triggered by the need to include the new Annex F regarding the production of an endocrine Athlete Biological Passport (ABP) Laboratory Documentation Package or an endocrine ABP Laboratory Certificate of Analysis by a Laboratory for the quantification of the Markers of the Endocrine Module of the ABP.

The revision also provided an opportunity to update other Laboratory Documentation Package requirements in the main document and the other five annexes as detailed in the Summary of Modifications (attached).

3. **RECOMMENDATION**

The 2023 version of the TD LDOC reflects the constant endeavor toward further improvement and harmonization of laboratory related anti-doping rules and activities.

The TD2023LDOC is presented for approval by the WADA Executive Committee, for implementation on 1 September 2023.

4. **ATTACHMENTS**

1. Summary of Modifications of the TD2023LDOC
2. Final version of the TD2023LDOC
3. Redlined version of the main document and individual annexes of the TD2023LDOC (to the current version in force)
4. TD2023 Index version 3.0
