<td>Cornelia Blank</td>
<td>UMIT TIROL - Private University for Health Sciences and Health Technology</td>
<td>Austria (United Kingdom, Germany, Spain, Slovenia)</td>
<td>A qualitative exploration of athletes’ lives, support needs and solutions after an anti-doping violation</td>
<td>A two-phase project examining athletes’ experiences following an Adverse Analytical Finding and Anti-Doping Rule Violation. Phase one will use athlete researchers to interview sanctioned athletes. The results will inform phase two, a community based Participatory Research (CBPR) approach discuss how the relationship of sanctioned athletes to sport, clean sport and anti-doping is shaped and how rehabilitation and space for reparation can be incorporated into anti-doping.</td>

<td>An empirical investigation of moral values and attitudes in the context of clean sport behaviors</td>
<td>The project aims to advance scientific knowledge and understanding about the role of sport-specific values in fostering moral attitudes and emotions towards doping, and accordingly inform values-based education practices. The project’s objective is to adapt the Values &amp; Moral Attitudes Model.</td>
<td>Team Sports, Individual Sports</td>

<td>United Kingdom (Kenya, Ethiopia)</td>
<td>Understanding (non-)adherence to the World Anti-Doping Code in athletics: Building capacity and amplifying voices in Ethiopia and Kenya</td>
<td>The project aims to aid AIU by investigating (non-)adherence to the World Anti-Doping Code (WADC) in Kenya and Ethiopia through a systematic consideration of the lived experience of athletes, athlete support personnel (ASP) and anti-doping/sporting organization staff. By amplifying African voices in track and field and road running, this project will offer unique insights into geographical regions that are under-served in anti-doping research.</td>

<td>A Mixed Study on Doping Behavior Amongst Malaysian Athletes in Individual Sports</td>
<td>This study aims to achieve that via a mixed-method study that includes a quantitative knowledge, attitude and perspective survey (KAP) of athletes from bodybuilding, cycling, weightlifting, athletics, aquatics and qualitative study involving interviewing past athletes that were sanctioned in the past in these sports. The data collected from the study will be analyzed and interpreted for future doping interventions within the country.</td>
<td>Bodybuilding, Weightlifting, Athletics, Aquatics, Cycling</td>
<td>USD 20,000</td>
