

TD2023LDOC

Summary of Major Modifications

The *Technical Document (TD)* on Laboratory Documentation Packages, TD2023LDOC, has been revised to consistency with the current TD MRPL.

Main Document

- In section 3.3.2 Additional Documentation for Non-Threshold Substances with a *Minimum Reporting Level (MRL)*, the details of the *MRL* adjustment, if the *Sample's* Specific Gravity (SG) is above 1.018, is removed and replaced with a reference to the TD MRPL for the details of the adjustment calculation.

The TD2023LDOC version 1.1 replaces the former TD2023LDOC version 1.0 and with the effective date of 1 October 2023, which has been set based on the consideration that version 1.1 has minimal impact on Laboratory operations.
