An Analytical Testing Restriction ("ATR") has been imposed on the Polish Anti-Doping Laboratory, limited to the application of the Confirmation Procedure for the substances related to modafinil (e.g., modafinil acid, modafinil and adrafinil). This ATR is in effect as of 10 March 2026. The Warsaw Laboratory can continue carrying out its regular anti-doping activities, as per the ISL. However, all routine samples that require confirmation analysis of substances related to modafinil shall be securely transported to another WADA-accredited laboratory.
