

**Report and Recommendations of the Asian Region Finance Committee Chaired by Professor Kamal Hadidi, Jordan**

*8<sup>th</sup> Asia/Oceania Region Intergovernmental meeting Riyadh, Kingdom of Saudi Arabia*

*21 May 2011*

**Background**

In May 2010, a decision was made at the 7<sup>th</sup> Asia/Oceania Region Intergovernmental meeting held in Delhi, India to establish a Finance Committee to look into the Asian Region Funding Formula for 2012 and beyond, refer Resolution 4.7:

- 4.7 Agree that a committee composed of the RADO Chairs of Asia and the WADA Asian Foundation Board members work with the WADA Asian/Oceania Regional Office as the Secretariat on options for the Asian Region formula contribution for 2012 and beyond. The recommendations of the committee are to be presented to the 8<sup>th</sup> Asian/Oceania Region Intergovernmental Meeting on Anti-Doping in Sport for consideration;*

**Asian Region Finance Committee Meeting**

On 17 September 2010, the Finance Committee, chaired by Dr Kamal Hadidi of Jordan met in Dubai, United Arab Emirates with the generous assistance of the Olympic Council of Asia. The Committee considered six different funding formula options - A, B, C, D, E (E1 and E2) and F, together with the feedback received from governments, via the RADO Chairs, on the options which had been circulated prior to the meeting. Please see Attachment One for a Summary of the feedback received and issues considered by the Committee.

When considering the funding formulas, the Committee kept in mind the importance for each country of the need for fairness, capability to make payments, the economic and political reality and the long term sustainability to support WADA activities.

**Funding Formula**

There were two opposite bodies of opinion expressed regarding the use of different economic indicators. One was to continue to use the current formula A, which uses GNI as the economic indicator, i.e. 85% GNI per capita and 15% sports indicator. The other was to use Option F, which is the European formula using GDP at a ratio of 5, to a population ratio of 1 (with minimum payment provisions).

The view that the contribution amounts for countries be fixed over a period of time was also strongly supported.

### Final Allocation 2012 of Formula Using Most Recent Available Economic Indicators

1) Insert the amount in Column J with the amount from Column N of 5th Allocation Spreadsheet

2) As no country's amount is lower than that of 2011 except elective 12 countries (Shown in Col K), all amounts are fixed.

All Figures in USD			2011 Public authority contribution	2010 Asian contribution		2012 Public authority contribution	2012 Asian Contribution		Contribution for non-fixed countries					
A	B	C	D	E	F	G	H	I	J	K	L	M	N	O

## 5th Allocation 2012 of Formula Using Most Recent Available Economic Indicators

1) Insert the amount in Column J with the amount from Column N of 4th Allocation Spreadsheet 2) Apply the minimum payment 5,000USD for 12 elective countries. 3) re-calculate the amount based on the formula (using 5th Allocation in raw data sheet) excluding the fixed countries (Col N in yellow, green, orange, purple and red)

#### 4th Allocation 2012 of Formula Using Most Recent Available Economic Indicators

1) Insert the amount in Column J with the amount from Column N of 3rd Allocation Spreadsheet. 2) If the estimated amount (Col J) is lower than that of 2011 (Col D / negative (-) in col K), then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in orange). 3) If not, re-calculate the amount based on the formula (using 4th Allocation in raw data sheet) excluding the fixed countries (Col N in M and N in yellow, green and orange).

### 3rd Allocation 2012 of Formula Using Most Recent Available Economic Indicators

1) Insert the amount in Column J with the amount from Column N of 2nd Allocation Spreadsheet. 2) If the estimated amount (Col J) is lower than that of 2011 (Col D / negative (-) in col K), then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in orange). 3) If not, re-calculate the amount based on the formula (using 3rd Allocation in raw data sheet) excluding the fixed countries (Col N in M and N in yellow, green and orange).

### 1st Allocation 2012 of Formula Using Most Recent Available Economic Indicators

1) Calculate the contribution based on the formula with 85% of economic indicator and 15% of sport indicator using the most recent available indicators (using original data in raw data sheet ) - Estimated contribution ( Col J), 2) If the estimated 2012-16 contribution (Col J) is lower than 2011 contribution (Col D / negative (-) in col K), then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in yellow), 3) Re-calculate the contribution based on the formula (using 1st Allocation in raw data sheet) excluding fixed countries (Col N in yellow).

**A - Final Allocation of Formula Using Most Recent Available Economic Indicators (85% GNI per capita / 15% Sport) for 2012-2016**

1) Insert the amount in Column J with the amount from Column N of 3rd Allocation Spreadsheet

2) As no country's amount is lower than that of 2011 except 12 elective countries (Shown in Col K), all amounts are fixed.

## A - 1st Allocation of Formula Using Most Recent Available Economic Indicators (85% GNI per capita / 15% Sport) for 2012-2016

1) Calculate the contribution based on the formula with 85% of economic indicator and 15% of sport indicator using the most recent available indicators (using original data in raw data sheet ) - Estimated contribution ( Col J), 2) If the estimated 2012-16 contribution (Col J) is lower than 2011 contribution (Col D / negative (-) in col K), then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in yellow), 3) Re-calculate the contribution based on the formula (using 1st Allocation in raw data sheet) excluding fixed countries (Col N in yellow).

## F - EU Formula with Group contribution (Japan and GCCY) for 2012 to 2016

Contribution rates were calculated in the second sheet "Formula Draft" then applied to the 2012-2016 contribution.

\*Japan keeps the current contribution amount and GCCY countries keep 2010 contribution amount

All Figures in USD

2011 Public authority contribution	2011 Asian contribution

## G - Final Allocation of Formula Using Most Recent Available Economic Indicators (85% Hybrid Economic & 15% Sport) for 2012-16

- 1) Insert the amount in Column J with the amount from Column N of 3rd Allocation Spreadsheet  
 2) As no country's amount is lower than that of 2011 except 12 elevte countries (Shown in Col K), all amounts are fixed.

<u>All Figures in USD</u>			<b>2011 Public authority contribution</b>	<b>2011 Asian contribution</b>	<b>ESTIMATED 2012-16 Public authority contribution</b>	<b>ESTIMATED 2012-16 Asian Contribution</b>	<b>Contribution for non-fixed countries</b>

## G - 3rd Allocation of Formula Using Most Recent Available Economic Indicators (85% Hybrid Economic & 15% Sport) for 2012-16

1) Insert the amount in Column J with the amount from Column N of 2nd Allocation Spreadsheet 2) Apply the minimum payment 5,000USD for 12 elective countries. 3) re-calculate the amount based on the formula (using 3rd Allocation in raw data sheet) excluding the fixed countries (Col N in yellow, green and red)

## G - 2nd Allocation of Formula Using Most Recent Available Economic Indicators (85% Hybrid Economic & 15% Sport) for 2012-16

1) Insert the amount in Column J with the amount from Column N of 1st Allocation Spreadsheet. 2) If the estimated amount (Col J) is lower than that of 2011 (Col D / negative (-) in col K), then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in green). 3) If not, re-calculate the amount based on the formula (using 2nd Allocation in raw data sheet) excluding the fixed countries (Col N in M and N in yellow and green).

## G - 1st Allocation of Formula Using Most Recent Available Economic Indicators (85% Hybrid Economic & 15% Sport) for 2012-16

1) Calculate the contribution based on the formula with 85% of economic indicator and 15% of sport indicator using the most recent available indicators (using original data in raw data sheet) - Estimated contribution (Col J), 2) If the estimated 2012-16 contribution (Col J) is lower than 2011 contribution (Col D / negative (-) in col K) , then maintain the 2011 contribution amount and current level of funding is fixed (Col M and N in yellow), 3) Re-calculate the contribution based on the formula (using 1st Allocation in raw data ) excluding fixed countries (Col N in yellow).

<u>All Figures in USD</u>			<u>2011 Public authority contribution</u>	<u>2011 Asian contribution</u>			<u>ESTIMATED 2012-16 Public authority contribution</u>	<u>ESTIMATED 2012-16 Asian Contribution</u>			<u>Contribution for non-fixed countries</u>				
			<u>13,210,049</u>	<u>2,702,776</u>			<u>14,945,958</u>	<u>3,057,943</u>			<u>1,516,426.99</u>

Comparison of Allocations

Given the opposing views expressed regarding GDP versus GNI per capita and the wish for fixed amounts, a compromise was reached. The Finance Committee requested the Secretariat develop further new options using a new hybrid economic indicator (i.e. 50% GDP and 50% GNI per capita) and fix the regions contribution level for 5 years. By fixing the amount for five years with a 2.5% increase annually, this does mean a sharp increase for many countries.

### ***Non-Paying Countries***

There are 15 countries that have never made a contribution, or may have made a few minimum payments over the past 7 years. In 2010, the loss to WADA for non-paying countries from the region was USD 103,480<sup>1</sup>. Suggestions to encourage payment were that International Federations or Major Games Organizations should not permit them to bid for or host any international sporting events. In cases where countries cannot pay due to difficult economic or political circumstances, a fund be established under the Asian Anti-Doping Foundation (AADF) to pay on their behalf (see paragraph below for full explanation of the AADF).

### ***Asian Anti-Doping Foundation (AADF)***

A proposal was made to establish a Foundation, AADF, with the purpose of: 1. Provide support to countries who have problems in terms of economic, political circumstances or other unexpected circumstances e.g. natural disaster, pandemic and wars. Payments could be made to WADA on their behalf from the Fund; 2. Prepare against possible future financial crisis in the event of economic problems for any major funding country in the region; 3. Assist with anti-doping policies and activities in the region. It was agreed that the Committee would consider issues related to the establishment of the Foundation.

### **Conclusion**

As a result of deliberations by the Finance Committee, the Secretariat prepared revised funding formula Options - A, F and G for presentation by the Chairman, to the 8<sup>th</sup> Asia/Oceania Region Intergovernmental Meeting in Riyadh in May 2011. Note, it is suggested that if a decision cannot be reached in Riyadh, then consideration be given to the current formula for 2011 being applied to 2012. It is important that a decision be reached to avoid WADA being unable to invoice governments for 2012.

### **Funding Formula Options A, F and G:**

When preparing the respective options, the following considerations were applied to each option:

The raw data for calculating the Sports Indicator used is: the number of athletes who participated at the Games in Guangzhou, China (Asian Games). NB: This differs from the raw data used for the options originally prepared for the Finance Committee in September 2010, which used the number of athletes who attended the Doha Asian Games. The raw data for calculating the Hybrid Economic Indicator i.e.

---

<sup>1</sup> Note, The IOC pays WADA, 1.00 for every 1.00 received from Governments. As a result the total contribution amount which WADA did not receive for year 2010 was USD 206,960. (current information, as of 23 March 2011)

50% GDP and 50% GNI per capita, is based on now United Nations statistics. NB: the data used for calculating the GDP and GNI per capita, differs from that used for the options originally prepared for the Finance Committee in September 2010. As a result of using the most up-to-date data for both indicators, countries contribution levels may change.

A total fixed amount for 2012 – 2016 was calculated and applied for all options below. The total fixed amount is USD 3,057,943 per annum (See Attachment Two for an explanation of how the fixed amount for 2012 – 2016 was calculated).

For the 15 countries who have never made a payment to WADA, or pay sporadically, 12 countries were identified by the Finance Committee as having problems paying due to difficult economic or political circumstances and therefore a minimum contribution amount of USD5000 has been allocated i.e. Afghanistan, Bangladesh, Cambodia, Democratic People's Republic of Korea, Iraq, Kyrgyzstan, Laos, Lebanon, Nepal, Palestine, Timor Lest and Yemen (12). For the three remaining countries Sri Lanka, Tajikistan and Turkmenistan, they should pay according to the formula.

- 1 Option A – Fix the amount for the 2012–2016 (see Attachment Two for an explanation of how the fixed amount was calculated) and retain the current formula as per the agreement of 2007 Kuala Lumpur Agreement, with a weighting of 85% Economic Indicator, GNI per capita, and 15% Sports Indicator. All countries are to keep the highest amount they have previously paid and a USD 5000 minimum payment for the 12 countries listed above.
- 2 Option F – Fix the amount for 2012–2016 (see Attachment Two for an explanation of how the fixed amount was calculated), Japan will pay their current level of contribution (i.e. 1,502,800), and the Gulf States and Yemen RADO countries retain their 2010 contribution levels, then the European Regions formula is applied, i.e. GDP with a weighting of 5 and population with a weighting of 1,with modification on minimum payments for small countries. NB: The 2007–2009 data for population and GDP was used for this formula, whereas 2008–2010 data should be used, however at this stage the latest data is not yet available.
- 3 Option G – Fix the amount for 2012–2016, (see Attachment Two for an explanation of how the fixed amount was calculated) and then apply an 85% Hybrid Economic Indicator (Note, the Hybrid Indicator comprises 50% GNI per capita and 50% GDP) and 15% Sport Indicator. All countries are to keep the highest amount they had previously paid and a USD5000 minimum payment for the 12 countries listed above.

## **Recommendations**

It is recommended that governments:

Note WADA does not make the final decision with respect to the contributions for the governments, this is a decision made by the governments;

Note at the direction of the Asian Region Finance Committee, the WADA Tokyo Regional Office acting as the Secretariat has prepared the revised options A, F and G for consideration by the 8<sup>th</sup> Asian Regional Government meeting;

Agree one of the options, A, F or G for funding the Asian Region for 2012 and Beyond and this decision can be made by either a simple majority or qualified majority i.e. repeat voting until the last 2 options are agreed;

Agree if a decision cannot be reached, then the current funding formula for 2011, be applied for 2012;

Agree the establishment of the Asian Anti-Doping Foundation (AADF) and request the Finance Committee continue to examine its establishment.

### ***A summary of feedback received from Governments and key issues raised and considered by the Committee:***

All Governments should be aware of the history of the contributions to WADA and how decisions were made in the early years by the International Intergovernmental Meeting on Anti-Doping in Sport (IICGADS). For the Asian Region, in the early years, only a small group of countries contributed to WADA and have consistently done so since the beginning making considerable efforts to make continued large payments.

Governments should maintain their level of contributions to WADA. The contribution amounts should be fixed for each country for several years because there is great difficulty for those countries paying on a percentage basis to explain the reasons for their dramatic increases to Government financial authorities.

GNI per capita is better than GDP as an economic indicator, as GNI shows the economic capacity of each country to make a contribution.

GDP is the right indicator to show economic performance in the international sphere. Whether an individual is rich or poor, based on GNI per capita has nothing to do with the financing of international organizations.

Continuing to use GNI per capita will mean some small countries will be unable to bear sharp increases each year. For example, the level of contribution of Brunei Darussalam is 50% of the Republic of Korea's and comparatively the Republic of Korea has the top ranking in the region in terms of economic and sporting prowess. Brunei Darussalam's under the current formula in 2012 will contribute 1/3 of the contribution that China will make in 2012. This seems to be unreasonable and unacceptable for small countries.

The European Formula, which uses GDP and population data as the indicator is not comparable to the situation in Asia where there are greater differences amongst countries e.g. China is the 2<sup>nd</sup> largest in GDP but 205<sup>th</sup> in GNI per capita with 1.3 billion people. India, Pakistan, Indonesia and Bangladesh have huge populations but are only developing economies. They will face problems if the European formula is applied.

It is necessary to consider options in-depth and come to a regional consensus. A new formula should not bring conflict amongst the countries in the region but should promote regional cooperation for doping free sports in Asia.

### ***Countries which do not make payments to WADA***

It is important to bear in mind the need for fairness, each countries capability to make payments, the economic and political reality and long term sustainability to support WADA activities.

Consideration needs to be given to the 15 countries that have never made a payment to WADA, or pay sporadically i.e. once or twice the minimum amount of 5000 and more. These countries are Afghanistan, Bangladesh, Cambodia, DPR Korea, Iraq, Kyrgyzstan, Laos, Lebanon, Nepal, Palestine, Sri Lanka, Tajikistan, Turkmenistan, Timor-Leste and Yemen (as of 9 March 2011).

These countries were placed into 3 categories. 1. Those who should be able to pay but currently do not i.e. Sri Lanka, Tajikistan and Turkmenistan (3 total); 2. Those who are in difficult economic and /or political circumstances and therefore should pay a minimum contribution i.e. Democratic People's Republic of Korea, Kyrgyzstan, Iraq, Lebanon, Palestine (5 total); 3. Those who should be exempted from paying, or should make a minimum payment if possible, also they are on the list of Least Developed Countries (refer: <http://www.unohrlls.org/en.ldc/related/62/>) i.e. Afghanistan, Bangladesh, Cambodia, Timor-Leste, Laos, Nepal and Yemen (7 total).

Suggestions to encourage payment by the Finance Committee were that International Federations or Major Games Organizations should not permit them to bid for or host any international sporting events, and the next World Ant-Doping Code should provide that payment to WADA is obligatory. In cases where countries cannot pay a Fund be established under the Asian Foundation to pay on their behalf.

### ***Other Matters also Considered by the Committee:***

- Any decrease of contribution by a country should not be approved as it would be a setback to the fight against doping in the region. The maximum payments made in the past and present should be kept as much as possible when doing the calculations for the various formulas in order to respect the agreements made at previous Intergovernmental meetings.

- The annual increase in contributions would not be acceptable for most countries and a fixed amount should be established for the region and kept for at least five years. For example, under the assumption of a 2.5% increase every year from 2012 to 2016, the Asian regions contribution amount would be fixed for 5 years from 2012 to 2016. (Note that as a result of fixing the amount, some countries may face a sharp increase in the amount of their contribution from 2011 to 2012).

- The Committee was not requested to decide upon one option over another, but to make a recommendation to the Intergovernmental Meeting in May 2011. The FC will provide the Ministers or their representatives at the meeting in Riyadh, with the most appropriate options in order to reach a regional consensus on a formula.

## **Attachment Two**

### ***Explanation of How the Five Year Fixed Rate Was Calculated:***

In order to calculate a fixed amount for the Asian Region contribution for the five year period 2012–2016, an assumption of a 2.5% increase every year from 2011 to 2016 was made, as shown in the table below.

The base amount used for 2012 was the contribution amount for 2011 (which was agreed in Delhi and based on the formula agreed in KL in 2007).

This means the fixed amount for the five year period 2012 – 2016 would be USD 3,057,943. As a result, there is a sharp increase for most countries in 2012.

In the event there was a surplus in any given calendar year, WADA should use it for those who do not pay and retain it in case there might be a loss in the region.

Cumulative 2012-2016	2011	2012	2013	2014	2015	2016
Public authority contribution @ 2.5 % 2012-2016	13,210,049	13,540,300	13,878,808	14,225,778	14,581,422,	14,945,958
Asia Share %	20.46%	20.46%	20.46%	20.46%	20.46%	20.46%
Asia Share	2,702,776	2,756,832	2,811,968	2,868,208	2,925,572	3,057,943
