

TD2019MRPL

Summary of Major Modifications

The Technical Document on Minimum Required Performance Levels for Detection and Identification of Non-Threshold Substances, TD2019MRPL, has been modified to account for the changes made in the new TD2019DL regarding adjustments for high (> 1.018) urinary specific gravity (SG):

- In footnotes c and f, it has been updated that the adjustment for the SG of the *Sample* shall be made when $SG > 1.018$.

The TD2019MRPL replaces the former TD2018MRPL.
