

TD2015NA

Summary of Major Modifications

The Technical Document on Harmonization of Analysis and Reporting of 19-Norsteroids Related to Nandrolone has undergone a brief revision by WADA's Laboratory Expert Group (LabEG).

The new version of the document, TD2015NA, includes the reporting of inconclusive GC-C-IRMS results for 19-NA as *Atypical Findings*. The TD2015NA also incorporates the possibility of performing GC-C-IRMS analyses to establish the exogenous or endogenous origin of 19-NA when its concentration is below the applicable Decision Limit.
